

Financial Aid Resources for International Students

There are many resources available to international students in search of financial assistance. Securing grants and scholarships will require diligent research, but the payoff may be significant. Potential sources to contact could include: businesses, civic and community organizations, national and local governments, private foundations and charities, professional or trade associations or religious organizations. Inquire about scholarships or grants for studying abroad in the U.S., in your field of study or based on your dissertation research topic. It can't hurt to also call organizations and foundations in your field to see if they have grants, or know of other organizations that do.

Please review the information on the CIIS Financial Aid Office page for details about applying to the CIIS Opportunity Scholarship and the Diversity Scholarship.
